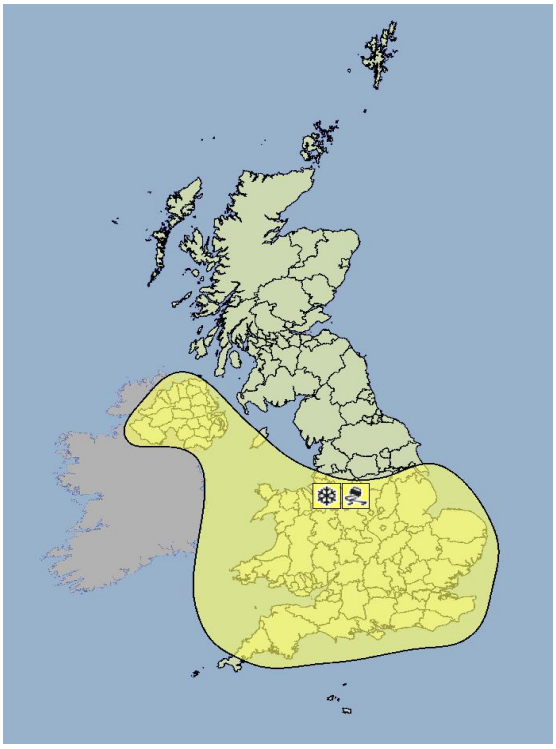
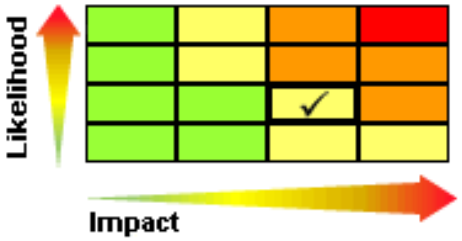
National Severe Weather Warning Service





Chief Forecasters Assessment
Whilst snow showers over Northern Ireland are likely to ease, further more persistent snow could move north into southern Britain later, giving a few cm in places. However, there remains significant uncertainty regarding this aspect.

This warning has been updated to remove the west of Cornwall and the Isles of Scilly. A reference to blowing around of existing snow cover has been added.

The Met Office have issued a **Yellow Warning** of **Snow and Ice**

Valid from **00:05 on Fri, 02nd Mar 2018** until **23:55 on Fri, 02nd Mar 2018**

Further snow showers or perhaps longer spells of snow are likely at times through Friday. There is an increasing chance that a further spell of more persistent snow may move north into parts of southern England, Wales and central England during the day. Icy stretches are likely on untreated surfaces. In addition, strong winds will lead to further drifting or blowing around of existing snow cover.

Delays and cancellations to public transport are possible, as are delays to travel on roads; some stranding of vehicles and passengers could also occur. Some rural communities could become, or remain cut off. Interruptions to power supplies and mobile phone coverage are also possible.
